# ALU SPEED LIGHT ICE DRILL

Extending our range of ALU ICE DRILLS, we have developed a standard product located below our premium product ALU SPEED:

our  
**ALU SPEED LIGHT.**

ALU SPEED LIGHT is based on the aluminum body of our ALU SPEED ice drill. The light version only differs from the premium product in the design of the cutting head.

- Fixed tungsten carbide insert with locking pin (TCT insert cannot get loose even in hammer mode)
- Can be resharpened any time

This optimized cutting head makes ALU SPEED LIGHT an affordable yet high-quality product for semi-professionals.

**NEW!**
