ALU SPEED ICE Auger Bit

- Suitable for drilling in snow, ice and debris
- With its approx. 500 grammes, it is an ultralight ice drill with a 100% metallic main body, without any short-lived plastics being used
- Exchangeable and reusable CNC-ground tungsten carbide hard-metal cutting edges
- Steep coils for optimum removal of the drilling material
- Rupture safety thanks to high-alloyed aluminium grade
- Low cutting pressure thanks to specially developed cup points and, as a result, little power needed
- Continuously stable CNC-milled and anodised aluminium main body
- Exchangeable hardened, chromium-plated shank in SDS Plus or trihedral shank design
- Corrosion-resistant main body and shank
- Long service life
- Can also be used with a cordless drilling machine
- Standard diameter 28-32-35-40 mm
- Special sizes on request
